Forex Options

Trade Forex Options and seize opportunities anywhere. Viptrade provides one of the most sophisticated offers worldwide, enabling you to set strike price with one-pip accuracy and adjust maturity dates from 1 day to 1 year on 45 instruments.

Stock Indices

Viptrade's FX platforms also allow you to trade on the movements of all the main European and American stock indices, as well as Japan's. Most of these CFDs are available both as Forward (with an expiration date) or Spot/Synthetic (no expiration date, overnight rollover/swap interest applies).

The table below shows the details for each type of CFD, as well as which platform they are available on.

Contracts	Underlying Assets	Expiration Date	Swap/Rollover	Commission	Platforms

Bonds

Government bonds create a benchmark against which riskier securities may be compared. With Viptrade, you can hedge your portfolio and trade the US T-Bond, the British Long Gilt and the German Bund.

The table below shows the details for each type of CFD as well as the platform they are available on.

Contracts	Underlying Assets	Expiration Date	Swap/Rollover	Commission	Platforms
Spot	Indices	X	✓	X	MetaTrader
Forward	Indices, Commodities, Bonds	✓	X	✓	MetaTrader

*Transactions sizes are given in lots. Value of 1 lot equals 100'000 term currency.

Trading Conditions Guide

1. Spreads & Commissions

Spreads are the difference between the bid and ask price for a currency pair or financial instrument. Viptrade provides competitive, variable spreads adapted to your initial deposit. They are measured in pips.

Viptrade applies all-in spreads – it does not charge any additional fees or commissions on transactions. All costs are included in the spreads.

Forward products are subject to the following round-turn commission fee:

Account Currency* Commissions round-turn for 1 lot

	Micro	PRO	VIP
USD	10	5	0
EUR	8	4	0
GBP	6	3	0
JPY	1'100	550	0
CHF	10	5	0
AUD	12	6	0
CAD	12	6	0
PLN	40	20	0
TRY	30	15	0
SEK	70	35	0
NOK	70	35	0
SGD	16	8	0
XGD	16	8	0
HUF	2'400	1'200	0
CZK	220	110	0

2. Pips

A pip is the smallest price change that any currency or financial instrument can make. For most currency pairs, it is equal to a 0.0001 price change in the quote currency. In currencies with low unit price, a pip can represent 0.01 units, one notable example being the Japanese Yen.

3. Transaction sizes

Viptrade offers flexible transaction sizes throughout all of its trading platforms. In addition, whenever the markets are open, our trading desk is available to assist you in placing orders, including transaction sizes greater than the ones stated in the conditions tables above.

4. Trading Hours

Viptrade maintains a 24 hour trading operation available for you by telephone or through all of its trading platforms whenever the markets are open, starting from 23:00 CET Sunday to 23:00 CET Friday.

5. Swap rates

Swap rates, also known as overnight or rollover rates, are either earned or paid for holding a position overnight. Viptrade settles overnight positions at 23:00 CET using the applicable formula and swap rates table below.

Position	Negative Swap Rate	Positive Swap Rate
Long	You Receive	You Pay
Short	You Pay	You Receive

MetaTrader Swap Formula:

(Base Amount * Short Swap Rate) / AUDJPY exchange rate)
(100'000 * - 0.00784983) / 96.553 = You pay 8.13 AUD

Viptrade applies a triple swap on **Wednesday 23:00 CET** to account for weekend rollovers.

There are some exceptions to this rule:

- Triple swap rollovers will be applied **Thursday 23:00 CET** for USDCAD, USDTRY and USDRUB.
- Triple swap rollovers will be applied **Wednesday 23:00 CET** for LCOUSD, NGCUSD and OIL100.

6. Cash adjustments

When any underlying stock that is part of a Spot Stock Index goes ex-dividend, the Spot Stock Index will be price adjusted to reflect this dividend. The weighted proportion of the applicable dividend within the Spot Stock Index will be credited (Long Positions) or debited (Short Positions) as a cash adjustment on your account on the Ex-date reflecting the market price movement on the Ex-dividend date. Only open positions held overnight on ex-dividend date are subject to dividend cash adjustments.

Please note: Spot Germany 30 is a Total Return Index, meaning the index is automatically adjusted for dividends.

7. Leverage & Margin Requirements

By default, Viptrade Bank has an initial margin requirement of 1% on most popular FX instruments, meaning that you need collateral on your account equal to 1% of the notional value of the position you want to open. In other words, your positions can be leveraged up to 100 times.

Example

In order to buy 100'000 EUR/USD at an ask price of 1.10, you would need 110'000 USD. With a leverage of 100:1 you only need to have the equivalent of 1'100 USD of available cash on your account (1% of the notional value of 110'000 USD) to open the position.

Total Open Position in Reference Currency = Trade amount x margin factor x market price x exchange rate.

If initial margin rate = 1%, then margin factor is 1
If initial margin rate = 2%, then margin factor is 2

B. MetaTrader Margin Level Calculation

$((\text{Account Balance} + \text{Unrealized P\&L}) / \text{Margin requirement on net open position}) \times 100 = \text{Margin Level}$

Trader X has a 10'000 USD balanced with an unrealized P&L of +1'000 USD. The open positions include long 300'000 USDCHF and short 200'000 USDCHF. Net open position is 100'000 USDCHF

$((10'000 \text{ USD} + 1'000 \text{ USD}) / 1'000 \text{ USD}) \times 100 = 1'100\% \text{ Margin Level}$

8. Stop Out Level

Subject to the limitations set forth in the General Terms and Conditions, the Risk Disclosure Statement and the Special Terms and Conditions for Forex to which we draw your attention, Viptrade's trading platforms are designed to automatically trigger a liquidation of open positions when the Margin Level ($[\text{equity}/\text{used margin}] \times 100$) reaches the Stop Out level, which varies depending on the technology you are using (the "Automatic Liquidation System").

The Automatic Liquidation System has been set up for the sole benefit of Viptrade. While the Automatic Liquidation System aims at avoiding that the Client is losing more than the Forex Margin and while Viptrade will ensure that, in the vast majority of cases, the Automatic Liquidation System is activated as soon as the Liquidation Percentage is reached, it is entitled but not obliged to do so. No warranty is given by Viptrade in this regard. The Client may still suffer a loss much higher than the Forex Margin.

Total open position (USD)	Stop out level
\$1'000 through \$30'000'000	0.30%
\$30'000'001 through \$40'000'000	1.00%
\$40'000'001 through \$50'000'000	1.25%
\$50'000'001 through \$60'000'000	1.50%
\$60'000'001 through \$70'000'000	1.75%
Over \$70'000'000	2.25% or greater

B. MetaTrader

Subject to the limitations set forth in the General Terms and Conditions, the Risk Disclosure Statement and the Special Terms and Conditions for Forex, when the Margin Level falls below 30%, positions with the largest loss (regardless of their size) will be liquidated first, until the margin level is back to 30% or more.

Please note that, in the case of aggregated positions exceeding the maximum transaction size on MetaTrader 5, such positions will first be liquidated up to the maximum transaction size. If the margin level is back to 30% or more after this first liquidation, no further liquidation takes place.

Inactivity Fee

The Company has the right to charge a commission for servicing the trading account in the amount of 10% of the account balance, but not less than 50 USD for each calendar month, if no trading operations are performed on the trading account for a period of more than two calendar months.

The inactivity fee will be deducted on a monthly basis until you resume your trading activity, close your account(s) or the balance of your account(s) is reduced to zero. (The fee may reduce your balance to zero, but will not take it into the negative.)".

The inactivity fee applies to retail clients only. The following clients are exempt from the fee:

- Introducing brokers
- Money Managers
- Institutional clients
- Corporate clients

*valid for accounts in CHF, USD, EUR or GBP – For other currencies, equivalent of CHF 10 will be charged

Forex transactions are highly speculative, involve an extreme degree of risk and are generally suitable only for persons who can assume and sustain a risk of loss in excess of their Forex margin. Forex transactions may, by their nature, generate losses that are in theory unlimited. In the absence of prior intervention, the loss could greatly exceed all the client's assets deposited with the Viptrade.
